

PROTECT OUR YOUTH

TOBACCO STOPS WITH ME.

“PROTECT OUR YOUTH” CAMPAIGN TOOLKIT

THE YOUTH VAPING EPIDEMIC

- In December 2018, the U.S. Surgeon General issued a rare advisory that e-cigarette use among youths has become a public health epidemic.
- E-cigarette use by high schoolers increased 78% between 2017 and 2018.¹
- 16% of Oklahoma high school students (1 in 6) use e-cigarettes.²
- E-cigarettes have become the most commonly used tobacco product among U.S. middle and high school students.
- In 2019, 1 in 4 high school students reported using tobacco in the past month.³
- Kids report vaping as early as 12 years old.
- JUUL is the most popular brand of e-cigarette.⁴

WHAT IS VAPING?

- “E-cigs” or “vapes” are electronic devices that heat addictive nicotine in flavored juice to create a smoke-like aerosol, which is inhaled by the user.
- The juice is often stored in replaceable pods.
- These devices look like everyday items – like USBs and school supplies – and can be easily hidden.
- Flavored products, such as menthol, mask the harsh tobacco taste, and the high concentrations of nicotine dramatically increase addiction potential in children.
- 4 out of 5 kids who have used tobacco started with a flavored product.⁵

WHAT IS VAPING?

- JUULs and other e-cigarettes contain nicotine, the same highly-addictive chemical that's in other tobacco products.
- One JUUL pod contains as much nicotine as a pack of cigarettes.
- Young people who use e-cigarettes are up to seven times as likely to use other forms of tobacco.⁶
- Nicotine can cause mood swings, anxiety, impulsivity, irritability and learning difficulties in young people.
- The nicotine in e-cigarettes can impair youth brain development, which continues until at least age 25.⁷
- JUUL aerosol contains cancer-causing chemicals and heavy metals.

WHAT CAN YOU DO?

- Ask kids about e-cigarettes and warn of their dangers.
- Express firm expectations that kids remain tobacco free.
- Learn about the types of e-cigarettes and learn how to spot them.
- Develop, implement and enforce tobacco-free policies at home and at school.
- Set a positive example by being tobacco free and vape free.
